

# Installing Maintenance Updates v8.x

Open OSAS to the Main Menu

Choose Resource Manager - Installation and Configuration - Install Maintenance Updates

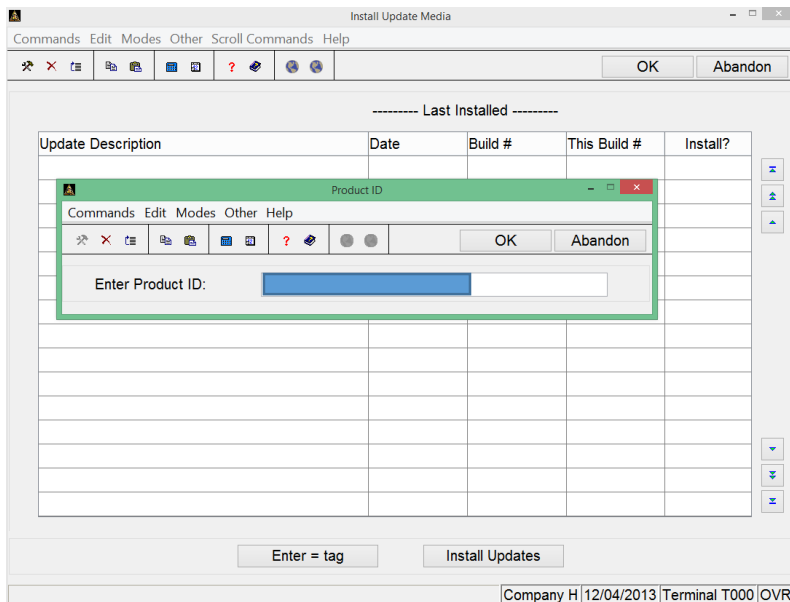

This screen brings up the Product ID key

NOTE: if you have updated your Product ID Key recently and this is not current

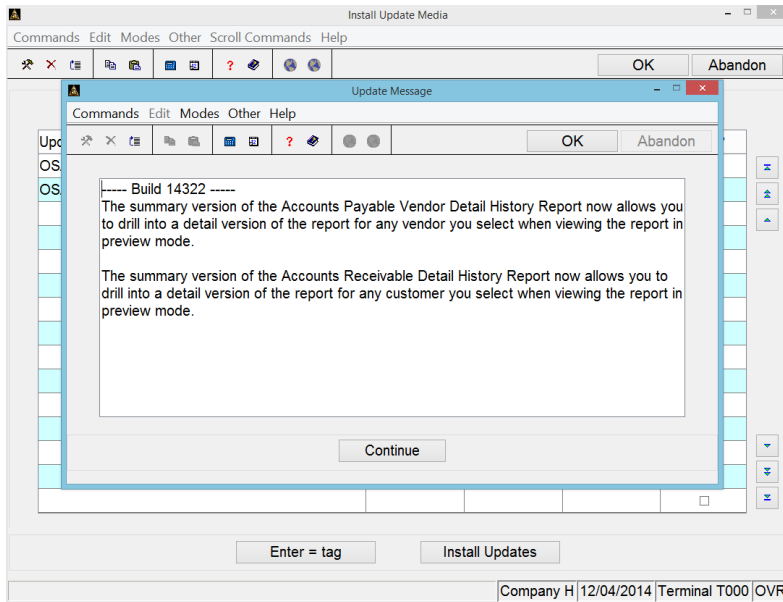

You can update it in RM – Installation and Configuration – Directories and System Information.

Press <Page Down> or click OK

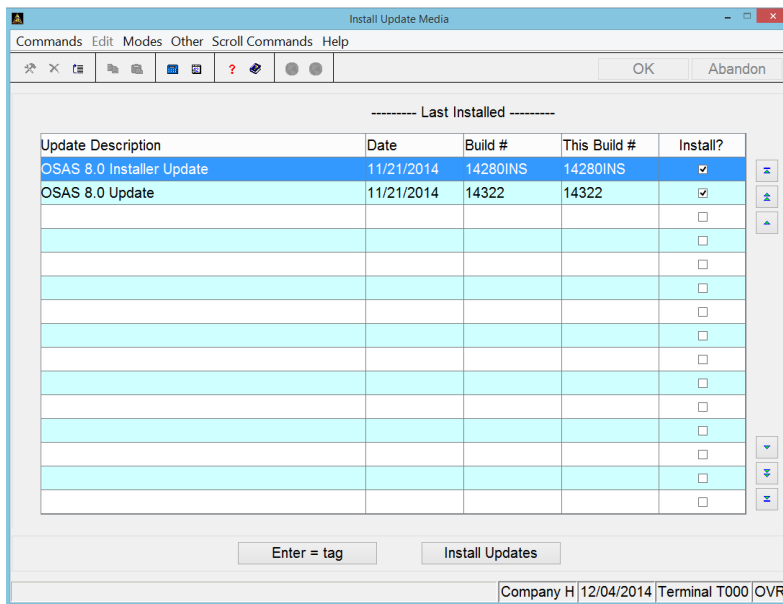

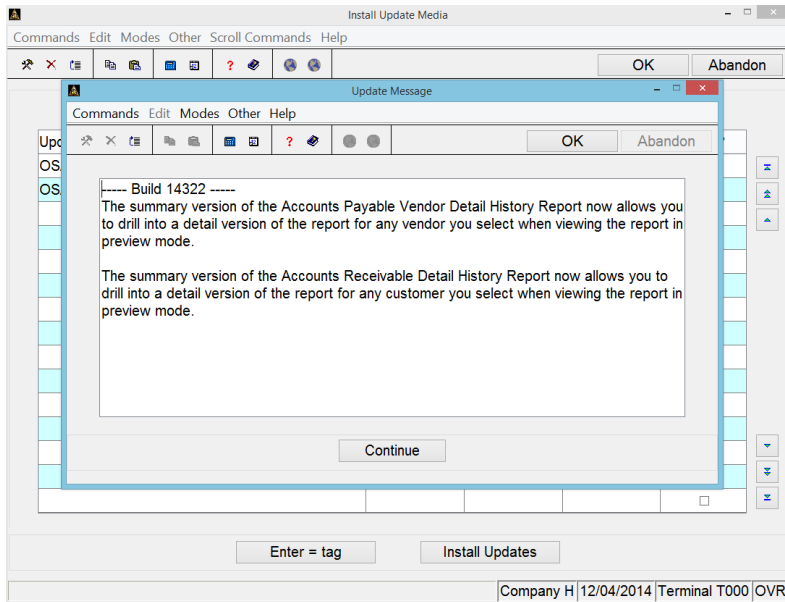

Review what the Build is updating

Press Continue

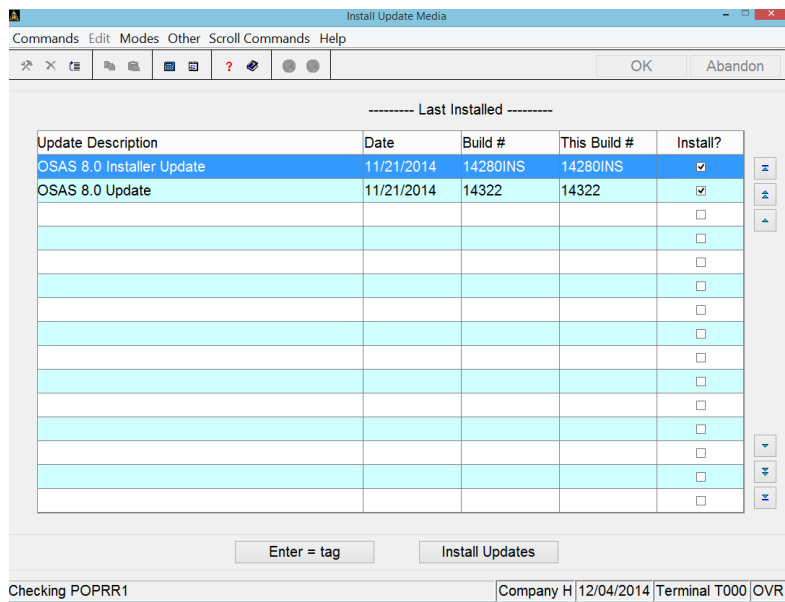

If you need updates this will come in tagged (and not let you untag it)

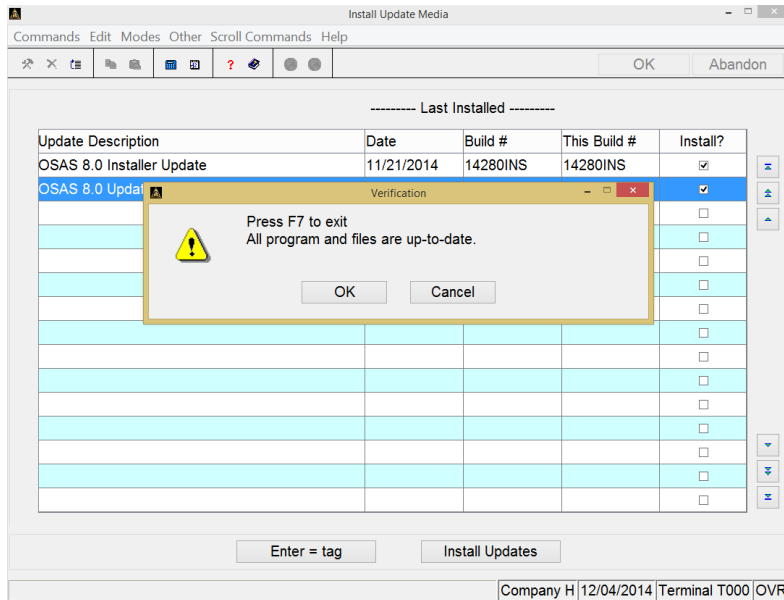

You will notice the bottom running through updates on the lower left

Then you will get the Verification box – press enter or click OK

Then your OSAS will close and open again to the login screen
